

EPICS is a cutting-edge learning program launched by BOMA Enspire that uses an Immersive Media Room with 3D/VR/Digital Twin technology to visualize building operational and retrofit environments.

This pilot project is free and open to building operators, new/mid-career retrofit professionals, skilled trades, and job-seekers interested in a career in Cleantech. Each micro-upskilling module offers experiential learning in the BOMA Enspire Immersive Media Room.

Canada's cleantech sector is growing and jobs are changing. Advance your career and be future-ready.

Experiential learning for building operators and retrofit talent pools

Connecting learning to real-life application.

Information is presented in an interactive touch-wall format with pop-out multimedia content playing on separate screens.

EPICS sessions include an Overview Module, an Experiential Learning Module, and/or a Participant Driven

Interactive Module or workforce development.
